

Session 6: Financing, Economics & Strategy

Helen Cook

Nuclear Business Platform - Africa

October 2019

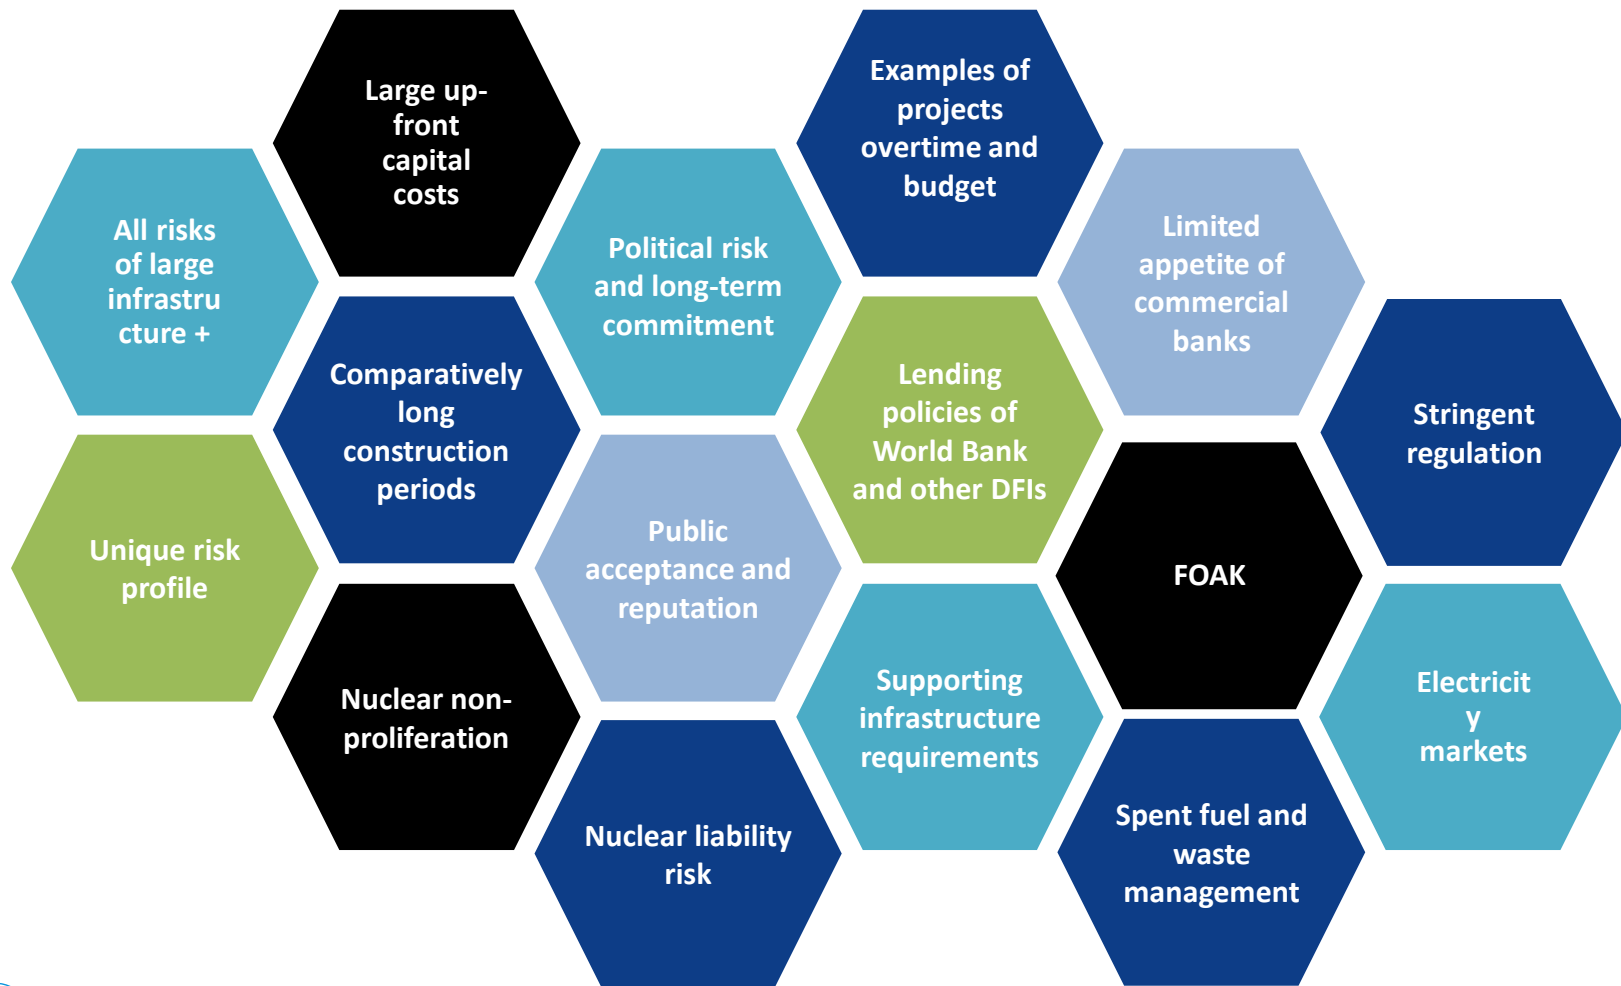

The financing challenge

One of the most significant challenges facing the nuclear sector today

Why?

A complicated project with a unique set of challenges

Historically

NPPs funded by governments / on
the balance sheets of government-
owned utilities

Today

Different approaches – no model

Trends

Government-
to-government
deals (with
finance)

Role of ECAs

Vendor finance

Host
government
support
mechanisms

Valuing climate
change
mitigation

Full system
costs

SMRs

What we know

Each project is unique and its financing solution will be bespoke
– a need to innovate
